It is advised that you have your original ACS certificate at hand when booking a course, to make sure you are being re-assessed on the correct units and appliances.

Only gas operatives who hold a current or recently lapsed (within the last 12 months) ACS qualification are eligible to apply for reassessment. ACS certificates are valid for 5 years.

If you do not hold an ACS qualification you should apply for the initial ACS assessment, details of which can be found in the BMF Guide to LPG ACS. This can be downloaded from the BMF Website – www.britishmarine.co.uk/training - then follow the LPG links, or contact the Training Department on 01784 473377 or training@britishmarine.co.uk.

Relationship between Training and Reassessment

It should be noted that there have been changes to the ACS criteria over the past five years, and a one/two day training course prior to reassessment will update operatives on these changes in order to fully prepare them for assessment.
